# 1. Source Code

## 1.1. Inline Source Code

Copy & Paste Hell!

```
class Main {  
    void main() {  
        System.out.println("Hello, World!");  
    }  
}
```

## 1.2. Included Source Code

Why not use the actual sources with highlighting, line numbers, callouts, and skip the file header?

*src/java/Main.java*

```
1 class Main {  
2     // tag::main[] ①  
3     void main() {  
4         System.out.println("Hello, World!");  
5     }  
6     // end::main[] ②  
7 }
```

① // tag::main[] starts a tag named "main"

② // end::main[] ends the tag

Just the method defined with the main the tag and fix indentation:

```
void main() {  
    System.out.println("Hello, World!");  
}
```

## 2. Miscellaneous

### 2.1. Software Documentation

Ctrl + Alt + Delete

Press [OK]

Select **File** > **Export** > **RAW**

### 2.2. Sidebars

#### Delete commented lines with sed

 Unfortunately, Mac und Linux handle `sed -i` differently:

*Mac*

```
sed -i '' '/^[@#]/d' "$file"
```

*Linux*

```
sed -i '/^[@#]/d' "$file"
```

### 2.3. Anchors

[Source Code](#)

[Color MindMap](#)

[Cameron Howe](#)

[Joe MacMillan](#)

# 3. Lists

## 01. numbered

### a. bulleted

- one
- two

### a. with colored symbols (colors defined as `roles` in `themes/basic-theme.yml`)

- ▲ positive
- neutral
- ▼ negative

## 1. separate two consecutive lists with `//-`.

more content for the same item

```
System.out.println("YAY!");
```

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Integer ut odio augue. Nam tristique rhoncus tortor, vitae sollicitudin risus hendrerit.

## 2. definition lists

### a. Question/Answer

1. *What is the answer?*  
42
2. *Computer says?*  
*Is it safe?*  
No.

### b. on next line

**e.g.**

for example

Do not confuse with *i.e.*

**i.e.**

that is

**et al.**

and others

c. on same line

**small**

**normal**

**large**

3. includes with parameters

- Cameron Howe <[c.howe@mutiny.com](mailto:c.howe@mutiny.com)>
- Joe MacMillan <[j.macmillan@calnect.com](mailto:j.macmillan@calnect.com)>

## 4. Tables

### 4.1. Simple

First	Last	Money (\$)
Homer	Simpson	-12.76
Marge	Simpson	4,538.90

### 4.2. Inline CSV

1	2	3
4	5	6
7	8	9

### 4.3. Included CSV

Height	Weight
15	23.4
17	26.7
23	45

### 4.4. Cell Content

Col 1	Col 2				
Source Code	<pre>List&lt;String&gt; collectorCollection =     productList.stream().map(Product::     getName).collect(Collectors.toList());</pre>				
List	<ol style="list-style-type: none"><li>one</li><li>two<ol style="list-style-type: none"><li>two-one</li></ol></li><li>three</li></ol>				
Table in Table	<table border="1"><thead><tr><th>Col1</th><th>Col2</th></tr></thead><tbody><tr><td>C11</td><td>C12</td></tr></tbody></table>	Col1	Col2	C11	C12
Col1	Col2				
C11	C12
